

R-Biopharm Enzymatic Kits

The key to control your wine quality.

Stable until the last droplet!

Maximising accuracy and reliability is an important factor for the wine industry. For this purpose R-Biopharm offers a wide range of test kits for various ingredients and substances found in beverages and food. These innovative kits ensure fast, affordable and highly accurate analysis with immediately available results.

- All kits consist of liquid-stable reagents, almost all in the established 2-component format (no reconstitution)
- Ready-to-use reagents, no dissolving of tablets, preparation of dilutions or similar necessary
- Easy handling with same pipetting scheme for all tests
- Suitable for manual as well as automated processing on almost any biochemical analyzer
- No wastage with small runs using manual methods
- Applications available to run with reduced quantities
- Developed and manufactured in Germany
- Exclusive use of qualitatively highly pure and highly specific enzymes
- Long shelf life down to the last drop and stable up to the expiry date, even after opening
- Wide measuring range
- All Enzytec Liquid tests run at 340nm
- Excel calculation spreadsheets available for manual and automated calculations or use our RIDASOFT™ Win.NET Food and Feed software for automating your calculations
