

Bethyl ELISA Kits

High-performing ELISAs you can count on

100% Guarantee

ELISAs are an essential component of the experimental workflow, and choice of supplier is critical to the success of customers research. Bethyl guarantees that its products will work under the same conditions stated on the product datasheet.

Contact Us Today!

Bethyl Laboratories are proud to offer ELISA kits for the detection of human IgG and IgM antibodies against SARS-CoV-2 in human serum or plasma.

The enzyme linked immunosorbent assays (ELISA) are for the detection of Human IgG or IgM antibodies specific for SARS-CoV-2 virus, specifically the RBD protein, in serum or plasma. The indirect ELISA uses a recombinant receptor binding domain (RBD) of the Spike1 protein of SARS-CoV-2.

These kits contain sufficient components to detect these antibodies in up to 45 samples, if tested in duplicate.

It is intended to aid in identifying individuals with an adaptive immune response to SARS-CoV-2, indicating recent or prior infection.

Description	Code	Description	Code
Mouse Albumin ELISA Kit	BETHE99-134	Human IgG ELISA Kit	BETHE88-104
Human Albumin ELISA Kit	BETHE88-129	SARS-CoV-2 IgG ELISA Kit	BETHE88-301
Bovine Albumin ELISA Kit	BETHE11-113	SARS-CoV-2 IgM ELISA Kit	BETHE88-302
