

## Gyrozen 416 Centrifuge Package Deal!

**Compact and versatile, a must-have for any laboratory!**

**Features:**

- Max Speed: 4,000rpm; Max Force: 2,774xg
- 10 program memory for easy storage of routine protocols
- Selectable Soft Start/Stop function, to minimise agitation
- Imbalance cut-off and concurrent alarms for safe operation
- Unique air flow design and anti-vibration structure to minimise heat and noise generation (<56dB when in operation)
- Automatic lid opening and lid drop protection, for easy and safe retrieval of samples when rotor is static
- 2-year warranty

**Applications:**

Commonly used in laboratories for the fractionation of blood samples and precipitation of biological samples, e.g.:

- General laboratory applications, including fractionation of foods/feeds, and biological sample separations of cellular materials, blood, urine, sperm, etc.
- Clinical applications of PRP, PRF, lipid cell separation, stemcell isolation, etc
- Gentle centrifugation or washing of gene chip, nanoparticle, and microbeads
- Air removal of paint, ink, and injection medicines

**Save Over \$900!**
