

## Scientific Model 926 Mk III Chloride Analyser

Includes **FREE** Active Salt Software

Description	Code	Price	Sale
Sherwood Scientific M926 Mk III Chloride Analyser	SHEW92600009	\$11,670	<b>\$10,500</b>
Active Salt Data Collection and Salt Analysis Package	SHEW92686500		

Salt measurement (Sodium Chloride) in the Food and Dairy Industry is universal. The ability to read directly, Salt concentration and the automatic endpoint detection system has made the 926 the instrument of choice for food manufacturers and analysts throughout the world.

Salt and salinity also represent serious contamination in many industrial processes. The sensitivity of the coulometric method enables ppm range measurement in boiler feed water; polymer washes; borehole slurries as well as soil salinity studies. Reading in ppm (mg/l) Chloride, the Select Button offers the immediate conversion of Chloride content into mg% Salt (Sodium Chloride) of the original sample.

- Automatic endpoint detection system using coulometric titration
- Fast – results in less than 40 seconds! (to 200mg/l)
- Ability to read salt concentration directly
- Measurement Range: 10 – 999mg/l or 2 – 165mg% Salt
- Optional Active Salt Software (requires PC and balance with RS232) eliminates transcription errors with no need to achieve specific sample and diluent weights

### Supplied complete with:

- M926 Chloride Analyser
- Printer Cable 9 way RS232
- Buffer (500ml)
- 200mg/l Chloride Standard Solution (100ml)
- 1 Pack of Anodes
- 1 Pack of Electrodes
- 2 Marked Beakers
- Silver Electrode Polish
- Stirrer
- Operator Manual
- Universal Mains Adapter
- USB lead A(M) – B(M)

Clinical version (M926S) also available – please contact Bio-Strategy for details.

VALID UNTIL:  
30 Apr 2023  
Ref. Code:  
SHEW-M926

Prices and discounts may be subject to change and only available while stocks last. Not valid with any other special offer or discounts and cannot be applied in retrospect.
