FEATURE

Bio-Strategy - Sustainability

Values & Principles of Sustainable Development (SD) for our business

Integrate into our business by:

representing international suppliers who share the same goal on SD

ensuring that our company complies with all industry-relevant certification

making sustainable investments

ongoing dialogue with our stakeholders to determine best practices

Implement into our business by:

encouraging the team to recognize and promote SD advantages

involving customers and suppliers

continually evaluating the potential impact of our business

training and information on SD

Our Contribution

Purchasing

Consolidate orders to reduce carbon footprint

Packaging

Use recycled packaging material / avoid plastics where possible

Donate | Recycle

Donate old stock where possible, recycle paper and electrical waste

Practical Tips :

Equipment Maintenance & Servicing

Regular maintenance and cleaning will reduce power consumption and increase life expectancy

Future Investments

Recommend environmentally friendly products and continuously search for New Technologies

Next Generation Technology

Rethinking Lab Consumables

Reduce consumable biohazard waste and cut costs up to 90% by using Grenova devices for tip and plate washing

Next Generation DNA/RNA Kits

Save on plastic consumables and liquid waste with **EchoLUTION**

Conversion to Hydrocarbon Refrigerants

Phase out CFC's in favour of eco-friendly natural refrigerants that have low global warming potential
