

Series 700 RN Syringes

Perfect for dispensing small volumes of solutions such as standards or spikes

Available in a range of termination styles with working volumes as little as 0.5uL & up to 500uL

From \$89

see pricing list page 2

This classic microlitre syringe series is known for its high-quality build & accuracy.

They incorporate a hand-fitted stainless steel plunger with a finely bored syringe barrel and ideal for homogeneous samples that are not prone to precipitation or bonding with glass.

Under the proper conditions, plunger wear is minimal and the life of a Microliter syringe is almost unlimited. However, when using heterogeneous solutions with a Microliter syringe, the user must be especially diligent about cleaning the syringe after each use.

For more information, see [Hamilton Syringe Care and Use Guide](#) on properly maintaining our syringes.

Prices and discounts may be subject to change and only available while stocks last. Not valid with any other special offer or discounts and cannot be applied in retrospect. All prices in local currency excluding GST and local delivery charges. Products advertised may be for research use only (RUO) or in vitro diagnostic use (IVD). Please refer to manufacturer's product insert for further information. For product use outside of that specified on the manufacturer's labelling and/or instructions for use, Bio-Strategy does not take responsibility.
