

SENSISpec ELISA Beta-Lactoglobulin (96 wells)

Effective & Reliable Allergen Control

Only \$760

Usually \$872

Code: GOLDHU0030002

A highly sensitive detection system, particularly capable of the identification and quantification of hidden milk proteins e.g. bovine milk residues in cookies, cereals, sausage, orange juice, wine, soy products and chocolate.

- Detection limit (LOD): 1.5 ppb
- Quantitation Range: 10 - 400 ppb
- Incubation Time: 60 min
