The Rotatemp high-temperature system enables precise temperature control of more difficult sample types, e.g. asphalt, bitumen, polymers, candy & adhesives.

Using proven IKA stirrer technology, the Rotatemp offers:

- A fast solution (up to 300°C in 16 mins, using a silicone oil)
- Precision control (no overshooting)
- Small footprint (heating and control unit in 1)
- Automation / connectivity (connects to the viscometer software labworldsoft® 6 Visc)

The Rotatemp - Designed for use with the IKA Rotavisc

Need a Rotavisc? Purchase along with the Rotatemp and receive **20% off** the current list price.

Prices and discounts may be subject to change and only available while stocks last. Not valid with any other special offer or discounts and cannot be applied in retrospect. All prices in local currency excluding GST and local delivery charges. Products advertised may be for research use only (RUO) or in vitro diagnostic use (IVD). Please refer to manufacturer's product insert for further information. For product use outside of that specified on the manufacturer's labelling and/or instructions for use, Bio-Strategy does not take responsibility.
