

PHCbi offer quality natural (gravity) convection incubators in two capacities to meet your culturing requirements.

#### Temperature

Ambient temperature **+5°C to 80°C**

#### Effective capacity

**93 liters/3.3 cu.ft.** [MIR-H163]

**153 liters/5.4 cu.ft.** [MIR-H263]

Microprocessor  
PID Control + Air Jacket

**Only \$2,989**

Usually \$4,271

93 L; 2 Shelves

Code: SANYMIR-H163-PE

The PHCbi MIR-H series Incubators provide a precise and stable culturing environment. The units feature high and low adjustable temperature alarms (both audible & visual) and have independent over-temperature protection. The stainless-steel interior finish further enhances the durability of the unit whilst making it easy to clean.

#### Key Features:

- Microprocessor PID control system combined with air jacket ensures accurate temperature control.
- High and low temperature alarms and self diagnostic function.
- Precise microprocessor temperature control with new LCD display
- Independent over temperature protection
- 5 Year warranty attests to quality and longevity of PHCbi products.

**Only \$3,342**

Usually \$4,775

153L; 3 Shelves
