ANSE4513-L	Large

PRODUCT HIGHLIGHT

- Reduced allergy risk
- Comfortable fit
- Heightened tactility
- Specialized protection:

RECOMMENDED FOR

- Tested for use with chemotherapy drugs
- Standard patient examinations
- Protection from latex Type I allergy and minimize chemical Type IV allergies in HCW's or patients

Designed with skin sensitivity in mind, Ansell Micro-Touch® NitraFree™ gloves are completely latex-free and accelerator-free, making them ideal for users prone to allergies or irritation. With no natural rubber latex and no chemical accelerators, they significantly reduce the risk of both Type I and Type IV allergic reactions. The soft nitrile formulation offers comfort, flexibility, and dependable protection for routine tasks in healthcare, lab, and cleanroom settings. For those who need gentle protection without compromise, NitraFree™ is the trusted choice.

Key Features:

- **Made without accelerators:** To protect from allergic reactions
- **Thin and lightweight:** To ensure excellent tactility while working
- **Chemotherapy drug resistance:** For specialized protection
