

Automated solution for mycotoxin analysis: CHRONECT Symbiosis RIDA®CREST

The unique combination of R-Biopharm's immunoaffinity clean-up cartridges with the Axel Semrau advanced liquid handling equipment provides a versatile platform technology that meets the growing demands of laboratories worldwide.

CHRONECT Symbiosis RIDA®CREST with IMMUNOPREP® ONLINE:

- Automated clean-up and concentration of samples
- Pre-programmed applications for a variety of complex matrices
- Reusable immunoaffinity cartridges
- Increased productivity and efficiency

Improved laboratory work-flow:

- Reduced analytical time
- Minimised time at the bench

Quality enhancement:

- The only automation that quality controls every cartridge!
- Better results the first time around
- Improved sensitivity: LOD and LOQ
- Reproducible and accurate results
- Exceeds CEN & AOAC method performance criteria

Eco friendly:

- Reduced chemical waste
- Lower material and transport costs

Cartridges available for a range of legislated mycotoxins!

Reducing time • Improving costs • Faster results
