

PRODUCT INFO

NEW 1 kg flask

In Scharlab we are aware of the importance of packaging our products with adequate and top-quality packaging to keep the product in condition optimal. In Scharlab we are aware of the importance of packaging our products with adequate and top-quality packaging to keep the product in condition optimal.

Since mid-2019, Scharlab chemicals packaged in a 1 kg bottle have a new format. The new package has a current and more ergonomic design, allowing optimal handling, storage and transport. It is made of high-quality materials and broad chemical compatibility to ensure product stability and maintain its specifications and technical characteristics stable over time.

➤ The product packaged in the current bottle and the new bottle will continue to be supplied for a while. According to the physical properties of each product it is possible to pack less or greater quantity in this bottle
