

Corning® Falcon® Tubes and Strainers

Simplify your Cell Workflow

Corning® Falcon® Conical Centrifuge Tubes are easy-to-use, high-quality tools to protect your precious samples. State-of-the-art design and manufacturing create tubes engineered to provide high strength, wide temperature stability, and to perform in your critical applications. Corning® Falcon® Conical Centrifuge Tubes are ideal for cell centrifugation, pelleting and separation by density gradients.

- Sterilised by gamma irradiation, noncytotoxic and nonpyrogenic
- Dark blue printed graduations and white writing patch
- Polyethylene flat-top screw cap allows one hand manipulation and provides a level writing area

Falcon® cell strainers are a sterile, easy-to-use device for rapidly isolating primary cells to consistently obtain a uniform single-cell suspension from tissues. Applications include stem cells and primary cells.

- A faster and easier alternative to gauze filtration in procedures involving dissociation of cells from either clumps or primary tissues
- Consistently obtain a more uniform single-cell suspension
- Three nylon mesh pore sizes for optimal performance in a variety of applications
- Sterilised and conveniently accessible in individual packaging
- Extended lip on strainer enables aseptic handling with forceps
- Strainers are made of a strong nylon mesh with 40, 70, or 100µm pores that are evenly spaced for consistent results
- Moulded color-coded polypropylene frame with tab enables easy handling
- Sterile
- Individually packaged
