

Rely+On Virkon

Change and innovation go hand in hand!

In a previous edition of our 'Source' brochure, we showed change and innovation can go hand in hand. Rely+On Virkon is the new name for the familiar Virkon product range, and innovation comes as a novel method for dispensing this high-level disinfectant.

What is this novel dispensing method?

Through collaboration with Reynard Health Services, a water proof pouch of dry wipes has a solution of Rely poured into it. This allows Rely+On Virkon to be dispensed easily using the impregnated wipes.

Using the impregnated wipes, you can be confident that a constant and correct concentration of high level disinfectant is being applied to hard surfaces. No more spray bottles and the need for extra wiping cloths. Such a dispensing system is being used extensively by a North Island District Health Board.

Call now and request a free trial of dry wipes and Rely+On Virkon tablets.

Rely+On Virkon in summary:

- Ideal hard surface disinfectant
- Broad spectrum Virucidal Disinfectant
- No known Pathogen resistance to the Oxidative Chemistry when used at recommended dilutions
- Solutions are stable for up to 5 days and are non-irritating when used at recommended dilutions
- Rely+On Virkon Efficacy tables available upon request
