

# Introducing the QIAGEN QIAcube Connect: The next generation QIAcube!

Redefining automated sample processing.

## Request a demo today!

The QIAcube Connect with advanced digital capabilities and connectivity builds on the success of QIAcube. The QIAcube Connect allows research laboratories to fully automate and track their well-known QIAGEN spin-column extraction and purification protocols – at the push of a button.

QIAcube Connect offers an augmented user interface that provides a new dimension of utility. Researchers can stay connected to their instrument through the built-in screen and also remotely with a tablet (included), containing the pre-installed QIAcube Connect App, enabling quick response times and the ability to monitor runs while away from the QIAcube Connect.
