

R-Biopharm Hygiene Bioluminescence Instrument

VALID UNTIL:
30 June 2019

Ref. Code:
RBIO-PD30

Purchase a PD-30 before 30 June 2019 at the special price of \$1,800.00 AND receive one FREE pack of 100 LuciPac® Pens!

The PD-30 Hygiene Monitoring AMP/ATP instrument offers a temperature stable, sensitive test for hygiene monitoring in your processing plants. Measure and detect organic residues and micro-organisms at high speed and high sensitivity by detecting ATP using luciferase, to monitor cleaning processes and microbiological control of coolant or other industrially processed water using the LuciPac® Pen Aqua.

- LuciPac® Pen – for hygiene control on surfaces
- LuciPac® Pen Aqua – to test for the cleanliness levels of water and other liquid samples
- Indications of improper cleaning processes, e.g. inadequate microbiological control of coolant or other industrial process water can be promptly detected.
- Measuring AMP increases the range of applications to an even wider range of organic residues
- Data analysis software allows you to easily select visible measurement sites and pass levels
