

Hamilton Company Neuros Syringes

Maximum Control, Minimum Damage

Make sure your syringe is the finest precision fluid measuring instrument in the world

Neuros syringe technology provides unprecedented functionality for controlled animal injections. An industry first, the Neuros accurately dispenses 50nl to 100µl of liquid through an ultrafine needle protected by a custom-designed sleeve. Developed specifically for the neurosciences, the Neuros minimises injection site damage by increasing needle rigidity and delivering a microvolume of liquid to an exact location.

- Needle rigidity improves insertion path accuracy
- Minimal tissue damage reduces injection variability
- Reduced sample loss saves money and materials
- Fine gauge needle creates smaller injection sites
- Compatibility with most infusion pumps and stereotaxic holders means an easy integration into existing processes
